Dean Finkelstein

Salesforce Managed Services Team Lead | 8x Salesforce Certified | Builds AI and agentic tooling

Matamoras, PA · finkelstein.dean@gmail.com · linkedin.com/in/deanfinkelstein · deanfinkelstein.github.io/resume

Availability: remote part-time, 20 to 30 hours a week, W2 or 1099, can start now. Evenings and weekends ET; daytime calls by appointment.

Technical version. The Plain English version and the source for each claim are on the web page.

SUMMARY

Salesforce consultant and team lead with five years at a Salesforce consulting partner and seven years before that in sales management and CRM administration. Leads a 13-client managed-services book at Cirrius Solutions: 80% renewal rate in H1 2026 (8 of 10 renewals due), the highest client survey (CSAT) score on the team, and one of nine delivery leads named on the entry that won Cirrius the 2027 Salesforce Partner of the Year for Customer Value. Builds AI tooling for his own operation and for clients, from a Claude Code operations agent to an AI security briefing now reused company-wide. Makes complex technical work simple for the people who depend on it, and still carries hands-on delivery as a lead.

SELECTED RESULTS

Widest client portfolio on the Managed Services team (13 clients). 80% renewal rate in H1 2026 (8 of 10 renewals due). Highest client survey (CSAT) score on the team.

Named as one of nine contributing delivery leads on the entry that won Cirrius the 2027 Salesforce Partner of the Year for Customer Value (Sept 2026).

Closed two managed-services renewals in Jul and Aug 2026, one of them for a further 12 months.

Converted a 244-line Health Cloud audit into 96 structured ClickUp tasks in about ten minutes with Claude Code and MCP. The same work previously took half a day by hand.

Led a Field Service rollout that leadership praised as a clear success, and shipped a sales team's KPI dashboard in CRM Analytics to their Sales homepage.

CORE SKILLS

Administration and development: Flow, validation rules and formulas, users, profiles, roles, permission sets and sharing, Data Loader, sandbox strategy, change sets, Production deployments; Apex, SOQL, Lightning Web Components (LWC), SFDX, Git

Clouds: Sales Cloud, Service Cloud, Experience Cloud, Health Cloud, Field Service, Salesforce Maps; Data Cloud (Data 360): setup, data streams and model, identity resolution, segments and activations

Analytics: CRM Analytics (CRMA), Tableau, Tableau Next, Lightning reports and dashboards

Integrations: DocuSign CLM, RingCentral, CallRail, carrier API remediation, SOAP Login Retirement analysis, Zapier, Salesmate, Delphi CRM

AI and agentic tooling: Claude Code, MCP, Obsidian, SharinPix "Work with AI", AI security briefings. Einstein for clients: Activity Capture, Lead and Opportunity Scoring, bots, Conversation Insights. Agentforce (Agent Script, Prompt Builder, Apex actions): practice builds, not yet for clients

Delivery and leadership: Managed services, SOW renewals, UAT coordination, End of Month reviews, pre-sales support, team leadership

AI TOOLING IN PRACTICE

- Thor: a Claude Code plus Obsidian operations agent that keeps COPs, daily notes, and task tracking current.
- Audit to tasks: a 244-line Health Cloud audit became 96 structured ClickUp tasks in about ten minutes through MCP. Half a day by hand before.
- Reusable skill: form requirements (Sheet, Doc, or PDF) become a ready-to-run SharinPix "Work with AI" prompt, with a back-up-first rule added after finding the vendor's AI regenerates the whole form.
- Client org analysis: Claude Code connected to a client org through VS Code to pull every piece of metadata a package touched, which made the analysis cleaner.
- Working rule: let the agent ask questions before it acts. Shared with the team, along with a client AI-security briefing that became a company-wide template.

PROOF

Agentforce agent: Agent Script, Apex actions, 16-question test plan. deanfinkelstein.github.io/resume/gallery/01-agentforce-resume-agent
Ask this resume: Claude chat grounded in this resume, on the live page. deanfinkelstein.github.io/resume/#ask
AI safety briefing: OAuth, data retention, and licensing. deanfinkelstein.github.io/resume/gallery/04-adopting-ai-safely/BRIEFING.pdf

EXPERIENCE

Cirrius Solutions Inc. · Salesforce consulting partner — Jun 2021 to present

Team Lead, Managed Services (Feb 2024 to present) · Senior Consultant (Jun 2023 to Feb 2024) · Salesforce Consultant (Jun 2021 to Jun 2023)

- Own delivery outcomes across a 13-client managed-services book. Lead the Managed Services team day to day, line-manage two consultants, run the daily standup, and carry hands-on technical delivery alongside.
- Run client governance: End of Month reviews, SOW renewals, and named point of contact for one client's data work. Built a pre-sales deck that leadership credited with getting the deal across the line.

- For a managed-services client: wrote an AI-security briefing as a branded PDF and walked the client's IT team through Claude's OAuth, data retention, and licensing so they could adopt it; the briefing became a company-wide template. Deployed a new build to Production and smoke-tested it. The client renewed its SOW in Aug 2026.
- For a medical-device manufacturer: reconnected the Salesforce-to-DocuSign CLM integration after it broke; wrote the SOAP Login Retirement integration analysis ahead of the platform deadline; moved a Health Cloud downgrade ahead of schedule; built the persona and permission-set model. Before a Full sandbox refresh, flagged every at-risk item, including items outside Cirrius's scope, and the client acted on it with a third-party vendor.
- For a client's sales organization: built the Sales KPI dashboard in CRM Analytics; it cleared tester feedback and went live on the Sales homepage. Tableau Next work that impressed the client's internal stakeholder. The account was one of three behind the Partner of the Year entry.
- For a client with a carrier API integration: verified the client's own failure diagnosis read-only against the org, confirmed it held, and caught a gap on the reschedule path the client had missed. Took ownership of the remediation build; the client's CEO confirmed the catch in writing.
- For a field-service client: led the Field Service (FSM) rollout and delivered Salesforce Maps enablement with a short walkthrough video.
- Organized the Managed Services team through a client's testing push and drove items to UAT.
- AI and methodology: run a Claude Code plus Obsidian operations agent that keeps project pictures, daily notes, and task tracking current. Connected Claude Code into a client org through VS Code to pull every piece of metadata a package touched. Built a reusable skill that turns a client's form requirements (Sheet, Doc, or PDF) into a ready-to-run SharinPix "Work with AI" prompt, with a back-up-first rule. Share the approach and demos with the team.
- Featured guest on the Cirrius podcast episode on Salesforce security (Apr 2026). Rated among the firm's most trusted, high-impact leaders in the mid-year review.

Final Mentor, LLC. · Fort Lauderdale, FL — Jun 2019 to Jun 2021

Customer Engagement Manager & CRM Administrator

- Owned all customer engagement activities and the instructional design of sales, marketing, and workflow automation products.
- Built workflow automations in Salesmate CRM and connected tools through Zapier within the platform's offerings.
- Ran business analysis to identify software that cut manual processes and sped up customer sales. Put virtual workplace technologies and processes in place during COVID-19.

Innovative Health Group, LLC. · Fort Lauderdale, FL — Mar 2017 to Jun 2019

Sales Manager / Salesforce Admin

- Managed fifty sales representatives against daily markers and monthly sales goals; mentored and motivated staff.
- Key player in the company's Salesforce Lightning implementation and its day-to-day Salesforce Admin: users and profiles, data imports (Import Wizard, Data Loader), custom reports and dashboards, user training, processes and flows, custom objects and fields, Lightning App Builder apps, AppExchange.
- Owned new-hire technology training and training development for new technology products.

Maggiano's Little Italy · Hackensack, NJ — Mar 2014 to Jun 2017

Regional Sales and Supply Chain Coordinator

- Ran all catering sales, supply inventory, delivery staff scheduling, and networking and marketing for the region. Organized philanthropic events to build brand awareness and catering sales.
- Used Delphi CRM to create and manage contracts, client follow-up, and service feedback.

EDUCATION

- Western Governors University, B.Sc. Information Technology Management, 2021
- Eagle Scout, Scouting America, 2009

HOW THIS PAGE WAS BUILT

One content file holds every line of this resume in two registers with a source for each claim. Three builds read it: this page, a Word copy for applicant tracking systems, and the two PDFs printed from this page. Before anything is published, I run a scan script on it that flags em-dashes, a list of filler phrases, and any client name. Built in Claude Code sessions under those rules, the same way I run client work: write the rules down, let the tooling enforce them, keep one source of truth.

Drafted with Claude Code under my rules: every number sourced, every quote verbatim, no filler, no client names.
